

MR Engineering Study Group Engineering Challenge:

**AN UNHEEDED PROBLEM, NEED
THAT COULD BE SOLVED WITH 3D
PRINTER AND SOLDERING IRON.**

Individuals or small teams develop and produce a creative prototype of the device as a solution for the task.
Would you or your team be willing to participate?

Let us know!

ISMREngineeringChallenge@protonmail.com

2021 Task:

Develop, demonstrate and share a tool for cleaning and sanitizing an MRI scanner!

- Sanitizes the scanner protecting the next patient and workers.
- Quick, easy, cost effective and safe to use.
- Enroll your team via ISMREngineeringChallenge@protonmail.com
 - Name of the team
 - Names and e-mail addresses of team members
- How to proceed:
 - Be creative and have fun!
 - Share the evolution of your project with pictures, videos and measurements from all milestones achieved or failed – that's engineering
 - Present at the annual meeting 2021
 - Contribute to Open Source Hardware
